SUMMARY

Junior Software Developer with over 2 years of expertise in developing robust Restful applications, specializing in micro-services architecture and cloud infrastructure. Proficient in enhancing application performance through the integration of advanced technologies. Adept in DevOps practices and skilled in establishing efficient CI/CD pipelines.

EXPERIENCE

Java Developer

Sobhan Tech

📅 July 2022 – Oct 2023 (1y 4m)   📍 Isfahan, Iran

- Increased performance of legacy code by 10% by optimizing duplicate SQL queries.
- Implemented the backend of shopiway.ir, laying the groundwork for user registration, product catalog, and checkout processes, resulting in a 10% faster launch.
- Extended features of zarebin.ir, improving product accuracy by 20%, and reducing API response times by using cache.

EDUCATION

B.Sc. in Computer Engineering

K.N. Toosi University of Technology

📅 Sept 2021 – Present

Helped CE freshmen (and women) understand fundamentals of programming and OOP better.

SKILLS

Java   Spring   Git   SQL   OOP   CI/CD   TDD   Redis   MongoDB

Problem Solving   Team work   Perseverance   Organization   Time Management   Confidence

PROJECTS

Simple Grading & Course Management System

Open Source Contribution

Developed backend for a grading and course management system for university students.

Simple Chat App

Open Source Contribution

Coded an online chatting app using socket programming and client-server architecture.

CERTIFICATES

Building Scalable Java Microservices with Spring Boot and Spring Cloud

Google Cloud
